

In today's retail environment, allowing customers to "try" before they "buy" poses some tough security challenges. This is especially true for laptops and other high-end electronic devices.

We answer this challenge with our new Freedom Guard suite of security solutions. These lightweight, freestanding products provide a cost-effective merchandising solution that will deter product theft while keeping your displays attractive and professional. Whether you want the rugged reliability of a lock-down bracket, or the advanced features of an electronic alarm, there is a Freedom Guard solution that will work for you.

All Freedom Guard products are designed to be easy to install and easy to operate. With a wide choice of colours and other options, it is easy to create a security system that is perfect for your display system.

## Laptop Bracket

### Sturdy Mechanical Security

With an adjustable metal bracket and sturdy cable, this system provides a rugged security option for a wide range of laptop devices.

*Features:*

- Steel bracket and cable securely protects merchandise, while still allowing customer use.
- Sturdy construction guarantees protection and long life.
- Bracket is available in three finishes (black, silver, and white) to coordinate with Mac and PC products.
- Can be adjusted to accommodate different laptop sizes.

## TechGuard

### Electronic + Mechanical Security

TechGUARD provides a winning combination, allowing you to integrate electronic and mechanical security features into a single system.

*Features:*

- Provides sturdy mechanical protection using a metal C-clamp attached to the merchandise and a metal cable attached to the display cabinet.
- C-clamp attaches to merchandise using a patented security screw inserted into an existing screw hole in the laptop chassis.
- Self-contained alarm module and sensor cable can be added to provide additional electronic protection.
- Audible alarm in module sounds if someone attempts to remove the C-clamp or cut the sensor cable.
- Alarm module operates on AC power or DC battery back-up.
- Alarm module and C-clamp have integrated LEDs to indicate when system is armed or in a state of alarm.
- C-clamp is available in four finishes (black, silver, red, and white) to coordinate with display merchandise.

## Electronic Alarm Module

### Electronic Security

The Freedom Guard 4-port alarm module with sensor cables provide advanced electronic-security features in a small freestanding system.

*Features:*

- Module provides electronic security for up to four products.
- Operates on AC power or DC battery back-up.
- Built-in audible alarm sounds if someone attempts to remove or cut the sensor cable.
- LEDs on alarm module and sensor cable indicate when system is armed or in a state of alarm.
- Multiple sensor-lead options are available for different applications.
