

If you are looking for an all-in-one merchandising system that is sleek, simple and secure, there is ONE clear choice. Introducing Freedom ONE – the revolutionary system that allows you to display, power and secure small merchandise using a single stand-alone device.

Freedom ONE was specifically designed for simplicity and ease of use. Simply attach the base to any flat surface, mount merchandise on the retractable puck, then activate using the security key. The system's integrated features now give shoppers the ability to demo a live, fully powered device while also protecting the product from theft.

Freedom ONE has several industry-leading design features, including wireless charging and our exclusive CarbonTether with anti-twist swivel. And while Freedom ONE works great on its own, available options make it easy to expand its capabilities. For example, you can set up each unit as hub to secure up to two additional products, link positions together to share a common keyswitch, or even add digital signage capabilities.

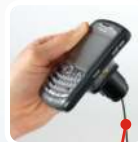

Together, these features make this the most advanced all-in-one system on the market today.

### All-in-one power & security without drilling or wiring

Stand-alone system contains all components needed to power & protect your merchandise.

**Sleek, compact form with retractable puck**

- Perfect way to showcase merchandise
- Customers can easily demo products while still keeping products secure

**Strong & flexible tether**

- Braided-steel CarbonTether™ provides superior cut resistance & lasts 4X longer than powered retractors
- TrueFeel™ feature provides low, steady resistance through the entire cable pull
- 360° swivel eliminates kinks

**Universal Power**

SmartCables™ provide power to product so device is always ready for demo use

**Advanced electronic security**

Sensors automatically monitor the presence of mounted merchandise & trigger the alarm if someone attempts to

**Built-in alarm siren**

Internal siren sounds if product tampering occurs.

**Light ring**

Shows if position is inactive, armed or in a state of alarm.

**Simple mounting options**

- Requires minimal tools & expertise to install
- Mount on any flat surface (horizontal or vertical) without drilling or wiring
- Secure using simple "peel & stick" VHB™ pad, mounting screws, or mounting plates

**Programmable security key**

Arm & disarm each position individually or all positions using a single key

### Options & accessories

**2-position sensor module**

Provides two external sensor ports so you can electronically secure up to two additional products.

**Chain module**

Use to link multiple positions together to share a single keyswitch and alarm, or to link positions to an existing Freedom system.

**Digital signage (Lift™) module**

Adds digital signage capabilities to each position so shoppers can view specific product information when they pick a puck from its base.

**Multiple cable gauges**

Select from three cable sizes to match your specific security needs:

Standard = .06" - Medium = .09" - Heavy = .13"

**Perfect-placement mounting plates**

Simplified mounting system allows you to easily add & remove positions.

**Fact tag holder**

Use to easily add a fact tag (e.g., price, features) to each position.

- ✓ All-in-one solution
- ✓ Easy to install & use
- ✓ Fewer false alarms
- ✓ Lower ownership costs
- ✓ Expandable
- ✓ Use alone or with other Freedom components
- ✓ Highest degree of security on the market
