

The Interactive Digital Display collection is a low-cost interactive display solution for brands and retailers.

These digital displays have been designed for use in commercial and retail applications.

Content can include multi-media presentations with audio. Products have been designed for easy update of display content. A range of model options that can be placed in strategic locations for effective results.

Classic

A presentation movie or image slideshow with audio plays your own brand/sales message.

A selection of accessories are available to provide a choice of location (Desk stand, shelf clip or wall clip).

Touch-Button

A low-cost interactive display solution.

One continuous movie plays your own brand sales message.

Consumers press a button to select 4 additional movies.

Touch-Screen Lite

An entry-level interactive touch-screen display solution.

Consumers touch the screen to select from a choice of 6 presentation movies.

Dispenser

A compact and integrated solution to combine multi-media advertising on a screen with POS material.

A counter-top unit which integrates Poster Display and Leaflet Dispenser.

Recharge

A collection of digital displays that feature a built-in rechargeable battery.

Two versions are available - Flashing Activation Button or Motion Sensor.

Battery Shelf Talker

This display has been designed to be cable free, powered by standard batteries (an AC power adaptor is also available).

Pressing the flashing activation button plays your movie or image slideshow with audio soundtrack. A static Ad-Panel also provides a strong branding area for your graphics message.
